

1. Project Development Phase:

Project Flow:

- Milestone 1 : Salesforce Developer Account Creation
- Milestone 2 : Custom Object Creation (Student, Course, Enrollment, Instructor)
- Milestone 3 : Tabs Creation
- Milestone 4 : Lightning App Creation
- Milestone 5 : Fields Creation
- Milestone 6 : Create Relationships
- Milestone 7 : Page Layout Customization
- Milestone 8 : Validation Rules
- Milestone 9 : Flows (Automation)
- Milestone 10 : Approval Process
- Milestone 11 : Reports
- Milestone 12 : Dashboards
- Milestone 13 : Security Setup
- Milestone 14 : Conclusion

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing
9. End-to-end application testing

Milestone 1-Salesforce:

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this: <https://youtu.be/r9EX3lGde5k>

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

Go to <https://developer.salesforce.com/signup> On the sign-up form, enter the following details:

First name & Last name Email

Role: Developer Company: College Name County: India

Postal Code: pin code

Username: should be a combination of your name and company

This need not be an actual email id, you can give anything in the format: username@organization.com

Click on sign me up after filling these

Activity 2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

A screenshot of the "Change Your Password" form in Salesforce. The form is titled "Change Your Password" and asks to "Enter a new password for lead@sb.oom." It lists requirements: "Make sure to include at least: 8 characters, 1 letter, 1 number". There are three input fields: "New Password" (with a "Good" status), "Confirm New Password" (with a "Match" status), and "Security Question" (with a dropdown menu showing "In what city were you born?"). Below these is an "Answer" field containing "asdfghjkl". At the bottom is a blue button labeled "Change Password". The entire form is enclosed in a red border.

4. Then you will redirect to your salesforce setup page.

Milestone 2 – Objects:

Activity 1: Creating Student Object:

The purpose of creating the student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the student object:

Go to the Setup page. Click on Object Manager.

Click on Create → Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students
3. Object Name: Student
4. Record Name: Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities (optional but recommended)
9. Track Field History (optional, if you want)

10. Under Search Status, select:

11. Allow Search

12. Click Save.

Activity 3: Create Lookup from Enrollment to Instructor:

Purpose:

To store which Instructor is assigned to a particular Enrollment.

Steps:

1. Go to Setup → Object Manager → Enrollment_____c.
2. Click Fields & Relationships → New.
3. Choose Lookup Relationship → Next.
4. Related To: select Instructor_____c → Next.
5. Field Label: Instructor (API Name: Instructor_____c).
6. Complete Field-Level Security and Page Layout options → Save.

The screenshot shows the Salesforce Setup interface. At the top, there's a 'Developer Edition' badge and a search bar labeled 'Search Setup'. Below the navigation bar, the 'Setup' menu is open, and 'Object Manager' is selected. The main content area is titled 'Enrollment' under 'SETUP > OBJECT MANAGER'. On the left, a sidebar lists various setup options: Details, Fields & Relationships (highlighted), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, and Related Lookup Filters. The main area displays the 'Fields & Relationships' section for the 'Enrollment' object. It shows several field types: Auto Number, Formula, Roll-Up Summary, Lookup Relationship (selected), Master-Detail Relationship, External Lookup Relationship, Checkbox, Currency, and Date. Each field type has a brief description of its functionality.

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation

Purpose:

To ensure students use only allowed institutional email addresses. Steps:

Go to Setup → Object Manager → Student_____c. Click Validation Rules → New.

Rule Name: Student Email Domain Validation. Error Condition Formula: (example for @student.edu)

- NOT (CONTAINS (Email_____c, "@student.edu"))

Error Message: Email must be a valid student institutional email. Error Location: Field → Email_c.

Click Save.

The screenshot shows the Salesforce Setup interface in 'Developer Edition'. The left sidebar contains a navigation menu with options like Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Object Access, Field Access, Triggers, Flow Triggers, Validation Rules (highlighted), and Conditional Field Formatting. The main content area is titled 'Student Validation Rule' and includes a description: 'Define a validation rule by specifying an error condition and a corresponding error message. The error condition is written as a Boolean formula expression that returns true or false. When the formula expression returns true, the save will be aborted and the error message will be displayed. The user can correct the error and try again.' Below this is the 'Validation Rule Edit' section with fields for Rule Name (Student_Email_Domain_Validation), Active (checked), and Description. The 'Error Condition Formula' section shows an example formula: 'NOT (CONTAINS (Email_____c, "@student.edu"))'. A 'Functions' pop-up window is visible, showing a list of functions including ABS and ACOS. The 'Save' button is highlighted.

The screenshot shows the 'Error Message' configuration page. It includes an 'Example' section with the text 'Discount percent cannot exceed 30%'. Below this, it states 'This message will appear when Error Condition formula is true'. The 'Error Message' field contains the text 'Email must be a valid student institutional email'. A note states 'This error message can either appear at the top of the page or below a specific field on the page'. The 'Error Location' section has two radio buttons: 'Top of Page' (unselected) and 'Field' (selected). The 'Field' dropdown menu is set to 'Email'. The 'Save' button is highlighted.

Activity 2: Fees Must Be Paid Before Approval

Purpose:

Prevent Enrollment from being approved until fees are paid. Steps:

1. Go to Setup → Object Manager → Enrollment_____c.
2. Click Validation Rules → New.
3. Rule Name: Fees_Must_Be_Paid_Before_Approval.
4. Error Condition Formula:

AND (

ISPICKVAL (Enrollment_Status_____c, "Approved"),

Fees_Paid_____c = FALSE)

5. Error Message: Fees must be paid before approving an enrollment.
6. Error Location: Top of Page (or field as needed). Click Save.

The screenshot shows the Salesforce Setup interface with the 'Object Manager' tab selected. The 'Enrollment' object is chosen, and the 'Validation Rules' section is active in the left sidebar. The 'Rule Name' field is set to 'Fees_Must_Be_Paid_Before_Approval', and the 'Active' checkbox is checked. The 'Error Condition Formula' section displays the formula: `AND( ISPICKVAL (Enrollment_Status__c, "Approved"), Fees_Paid__c = FALSE )`. A 'Check Syntax' button is visible below the formula. On the right, a 'Functions' list is open, showing various functions like ABS, ACOS, and ADDMONTHS.

Milestone 6 – Approval Process

Activity 1: Create Approval Process for Enrollment Requests

Purpose:

Route Enrollment requests to the Training Manager for approval or rejection.

Steps:

1. Go to Setup → Approval Processes → select Enrollment_____c.
2. Click Create New Approval Process → Use Standard Setup.
3. Process Name: Approval Enrollment Request.
4. Entry Criteria: Enrollment_Status c = "Requested".
5. Save and configure steps.

6. Add Approval Step:
7. Approver: specific Training Manager user.
8. Under Final Approval Actions:
9. Add Field Update to set Enrollment_Status c = "Approved".
10. Under Final Rejection Actions:
11. Add Field Update to set Enrollment_Status c = "Rejected".

A screenshot of the 'Field Update Edit' form in Salesforce. The form has three tabs: 'Identification', 'Specify New Field Value', and 'Picklist Options'. The 'Identification' tab is active. It contains fields for 'Name' (Set Status to Rejected), 'Unique Name' (Set_Status_to_Rejected), 'Description', 'Object' (Enrollment), 'Field to Update' (Enrollment: Enrollment Status), 'Field Data Type' (Picklist), and 'Re-evaluate Workflow Rules after Field Change' (unchecked). The 'Specify New Field Value' tab is partially visible, showing 'Picklist Options' with three radio buttons: 'The value above the current one', 'The value below the current one', and 'A specific value' (selected). The 'A specific value' option has a dropdown menu showing 'Rejected'.

12. Add Email Alert to send rejection email to student.

13. Activate the approval process.

Milestone 7- Tabs

Activity 1: Creating a Tab for the Student Object:

Go to Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object list.
4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

The screenshot shows the Salesforce Setup interface. In the left sidebar, the 'Setup' menu is open, and 'Tabs' is highlighted under 'User Interface'. The main content area is titled 'Edit Custom Object Tab Students'. Below the title, it says 'Fill in the fields below to define the custom tab.' The 'Custom Tab Definition Edit' section is expanded, showing 'Custom Object Tab Information'. A red box highlights the following fields: 'Tab Label' (Students), 'Object' (Student), and 'Tab Style' (Airplane). Below these, there is a dropdown for 'Splash Page Custom Link' set to 'None'. At the bottom, there is a 'Description' field and 'Save' and 'Cancel' buttons.

Activity 2: Creating Remaining Tabs

Now create the Tabs for the remaining Objects, they are “Courses, Instructors, Enrollment”.

Follow the same steps as mentioned in Activity -

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project

Navigate to Setup.

Enter App Manager in the Quick Find search box. Click New Lightning App.

Provide the app details:

App Name: Student Enrollment & Course Management Developer Name auto-fills

Description: Optional, but can describe the purpose of the app Click Next and choose the following settings:

App Branding (optional): Add logo or select color theme Navigation Style: Choose Standard Navigation

Click Next and assign the app to specific profiles (e.g., **Admin, Enrollment Officer, Instructor**).

Click Next to select the items (tabs) to be included in the app. Add:

1. Student
2. Course
3. Instructor
4. Enrollment
5. Reports
6. Dashboards
7. Home
8. Tasks

Click Next and review the app settings. Finally, click Save & Finish.

App Details & Branding

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

Milestone 9 – Page Layouts and Record:

Activity 1: Create Record Types for Enrollment:

Purpose:

To separate New Enrollment vs Re-Enrollment processes. Steps:

1. Go to Setup → Object Manager → Enrollment_____c.
2. Click Record Types → New.
3. For the first record type:
 - Existing Record Type: Master
 - Record Type Label: New Enrollment
 - Enable for required profiles (Admin, Enrollment Officer).
 - Select the default Page Layout → Save & New.
4. For the second record type:
 - Record Type Label: Re-Enrollment
 - Enable for the same profiles.
 - Select the default Page Layout → Save.

7. Owner Id: Admin user Id.
8. What Id: Enrollment Id.
9. ActivityDate: formula Today + 2.
10. Save as Create Follow up Task → Activate.

Milestone 11 – Reports:

Activity 1: Create “Students by Status” Report

1. Go to **Reports** → **New Report**.
2. Report Type: Students.
3. Group rows by Status_____c.
4. Add columns as needed (Name, Email, Phone).
5. Save as Students by Status.

Activity 2: Create “Enrollments by Course” Report

1. New Report → Report Type: Enrollments.
2. Group rows by Course_____r. Name.
3. Show Record Count per course.
4. Save as Enrollments by Course

Activity 3: Create “Pending Enrollment Approvals” Report

- 1 . New Report → Enrollments report type.
- 2 . Filter: Enrollment_Status_____c = "Requested".
- 3 . Add columns (Student, Course, Owner, Created Date).
- 4 . Save as Pending Enrollment Approvals.

Activity 4: Create “Revenue Report (Fees Paid)” Report

- 1 . New Report → Enrollments report type.
- 2 . Filter: Fees_Paid_____c = TRUE.
- 3 . Group by Course_____r.Name.
- 4 . Summarize Course_Fee_____c or similar fee field.
- 5 . Save as Revenue Report – Fees Paid.

Milestone 12 – Dashboards:

Activity 1: Create “Student Management Dashboard”

Steps:

1. Go to **Dashboards** → **New Dashboard**.
2. Name: Student Management Dashboard.

3. Select folder → **Create**.
4. Select the new Dashboard folder and Save

Add components:

- **Donut Chart** → using Students by Status report.
- **Bar Chart** → using Enrollments by Course report.
- **Gauge** → using Revenue Report – Fees Paid (sum of revenue field).
- **Table** → using Pending Enrollment Approvals report.

5. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles):

1. Go to **Setup** → **Profiles** → **New** (or Clone **Profiles Required:**

- **Admin** – Full access.
 - **Enrollment Officer** – Create/Update Enrollments.
 - **Instructor** – Read-only access to assigned Enrollments.
- #### 2. Steps (example for **Enrollment Officer** fName: Enrollment Officer.
- #### 3. In **Object Settings**:
- Enrollment_c: Read, Create, Edit.
 - Student__c / Course__c: Read (and Edit if required).
- #### 4. Save.

Repeat similarly for **Instructor** profile with **Read-Only** on Enrollments.

The screenshot shows the Salesforce Setup interface in Developer Edition. The left sidebar has a search bar with 'prof' and a list of 'Users' and 'Profiles'. The main content area is titled 'SETUP Profiles' and shows the 'Enrollment Officer' profile. It includes a description, a list of enabled permissions (e.g., Login IP Ranges, Enabled Apex Class Access, etc.), and a 'Profile Detail' section with fields for Name, User License, Description, Created By, and Modified By. The 'Page Layouts' section shows the 'Global' layout assigned to the profile.

The screenshot shows the Salesforce Setup interface in Developer Edition. The left sidebar has a search bar with 'prof' and a list of 'Users' and 'Profiles'. The main content area is titled 'SETUP Profiles' and shows the 'Instructor' profile. It includes a description, a list of enabled permissions (e.g., Login IP Ranges, Enabled Apex Class Access, etc.), and a 'Profile Detail' section with fields for Name, User License, Description, Created By, and Modified By. The 'Page Layouts' section shows the 'Global' layout assigned to the profile.

Activity 2: Create Permission Sets

1. Go to **Setup** → **Permission Sets** → **New**.
2. Create Custom Object Access (additional access to project objects if needed).
3. Create Dashboard Editor (Create/Customize Reports & Dashboards permissions).
4. Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

1. Go to **Setup** → **Sharing Settings**.
2. Set Organization-Wide Defaults:
 - **Students (Student__c)**: Public Read/Write.
 - **Courses (Course__c)**: Public Read/Write.
 - **Enrollments (Enrollment__c)**: Private.
3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a **User lookup** on Enrollment (Instructor User).

Use a simple **Record-Triggered Flow** to set **Owner Id = Instructor User** so they can see only their own records
